Building a website "workers"

Building a local website "workers" using HTML CSS, framework BOOTSTRAP and JAVASCRIPT for frontend side.
using PHP for backend and MYSQL for data base

End of studies' project

"Realization of a WEB Application for the management and tracking student absences" using
(Reactjs, Bootstrap, Nodejs and mysql)

OBJECTIVE

Highly motivated and skilled programmer seeking a challenging position in a dynamic software development company. Dedicated to delivering innovative and efficient solutions, I aim to contribute my technical expertise and passion for coding to drive the success of projects while continuously expanding my knowledge and skills in the field. With a strong foundation in programming languages and experience in software development methodologies, I strive to collaborate with a talented team to create robust and user-friendly applications that positively impact end-users.
